

Brennan Paterson serves as the Chief Administrative Officer of the Department of Business and Industry's Mechanical Compliance Section, a unit with responsibility for regulating elevators, escalators, moving walks, boilers, and pressure vessels in the State of Nevada. He has worked extensively in a wide variety of regulatory arenas, including contractual compliance, hazardous materials management and response, explosives, armaments, and export control.

Mr. Paterson graduated with honors from the University of Nevada, Reno as a Bachelor of Arts in History. It is this training in historical research which enabled him to master every field of regulation he has been involved in. He believes in a bright, safe, and innovative future for all Nevadans.
